

VMware vSphere with Kubernetes: Deploy and Manage

Course Overview

During this 3-day course, you focus on deploying and managing VMware vSphere® with Kubernetes. You learn about how vSphere with Kubernetes can be used to orchestrate the delivery of Kubernetes clusters and containerized applications in a VMware vSphere® environment.

Course Objectives

By the end of the course, you should be able to meet the following objectives:

- Describe vSphere with Kubernetes and use cases in on-premises environments
- Deploy vSphere with Kubernetes
- Describe the VMware NSX® networking requirements for vSphere with Kubernetes.
- Create and manage vSphere with Kubernetes namespaces
- Deploy and run container applications on vSphere with Kubernetes
- Deploy and configure VMware Harbor
- Describe the VMware Tanzu™ Kubernetes Grid™ service
- Deploy a Tanzu Kubernetes Grid cluster
- Deploy and run container applications on a Tanzu Kubernetes Grid cluster
- Describe the vSphere with Kubernetes lifecycle
- Use logs and CLI commands to monitor and troubleshoot vSphere with Kubernetes

Target Audience

Experienced system administrators and system integrators responsible for designing and implementing vSphere with Kubernetes

Prerequisites

This course requires completion of the following courses:

- [VMware vSphere: Install, Configure, Manage](#)
- [VMware vSphere: Optimize and Scale](#)
- [VMware NSX-T Data Center: Install, Configure, Manage](#)

Experience working at the command line is helpful.

This course requires that a student be able to perform the following tasks with no assistance or guidance before enrolling in this course:

- Create VMware vCenter Server® objects, such as data centers and folders
- Create a virtual machine using a wizard or a template

- Modify a virtual machine's hardware
- Migrate a virtual machine with VMware vSphere® vMotion®
- Migrate a virtual machine with VMware vSphere® Storage vMotion®
- Configure and manage a vSphere DRS cluster with resource pools
- Configure and manage a VMware vSphere® High Availability cluster

If you cannot perform all of these tasks, VMware recommends that you complete one of the prerequisite courses before enrolling in VMware vSphere with Kubernetes: Deploy & Manage.

Course Delivery Options

- Classroom
- Live Online
- [Onsite](#)

Product Alignment

- VMware vSphere 7

Course Modules

1 Course Introduction

- Introductions and course logistics
- Course objectives

2 Introduction to Containers and Kubernetes

- Describe Virtual Machines and Containers
- Describe Container Hosts
- Describe Container Engines
- Describe Dockerfile
- Describe Container Images
- Describe Image Registry
- Describe the purpose and functionality of Kubernetes
- Describe Manifest YAML files
- Explain Pod YAML files
- Explain ReplicaSets
- Explain Services
- Explain Deployments

3 Introduction to vSphere with Kubernetes

- Describe the purpose and functionality of vSphere with Kubernetes
- Explain the integration with VMware Tanzu™ Mission Control™
- Describe the capabilities of vSphere with Kubernetes
- Describe the components of vSphere with Kubernetes
- Contrast vSphere with Kubernetes to traditional Kubernetes
- Describe the requirements for vSphere with Kubernetes
- Prepare a vSphere cluster for vSphere with Kubernetes
- Describe the NSX components required for vSphere with Kubernetes
- Describe the network topology of vSphere with Kubernetes
- Explain the networking requirements of vSphere with Kubernetes
- Compare NSX networking objects with Kubernetes networking objects

4 vSphere with Kubernetes Core Services

- Explain the architecture of the vSphere with Kubernetes Core Services
- Describe the Container Service
- Describe the Volume Service
- Describe the Network Service
- Describe the Registry Service
- Describe the use cases of vSphere with Kubernetes
- Enable vSphere with Kubernetes
- Deploy VMware Harbor Registry

5 vSphere with Kubernetes Namespaces

- Describe a vSphere with Kubernetes namespace
- Contrast a vSphere with Kubernetes namespace to a traditional Kubernetes namespace
- Describe Resource Quotas
- Explain Authentication and Authorization to vSphere with Kubernetes
- Explain the use cases of namespaces
- Create a namespace
- Describe kubectl
- Use kubectl to interact with vSphere with Kubernetes
- Describe using kubectl pod deployment
- Explain scaling a pod deployment
- Explain managing pod lifecycle
- Explain deleting pods
- Use kubectl to deploy a pod
- Use kubectl to scale a pod
- Use kubectl to switch between namespaces

6 VMware Tanzu Kubernetes Grid service

- Explain Tanzu Kubernetes Grid service
- Describe the use cases for Tanzu Kubernetes Grid clusters
- Describe the integration with Tanzu Mission Control
- Explain the lifecycle of Tanzu Kubernetes Grid clusters
- Deploy Tanzu Kubernetes Grid cluster
- Deploy pods to a Tanzu Kubernetes Grid cluster

VMware, Inc. 3401 Hillview Avenue Palo Alto CA 94304 USA Tel 877-486-9273 Fax 650-427-5001 www.vmware.com

VMware warrants that it will perform these workshop services in a reasonable manner using generally accepted industry standards and practices. THE EXPRESS WARRANTY SET FORTH IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESS, IMPLIED, STATUTORY OR OTHERWISE INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE WITH RESPECT TO THE SERVICES AND DELIVERABLES PROVIDED BY VMWARE, OR AS TO THE RESULTS WHICH MAY BE OBTAINED THEREFROM. VMWARE WILL NOT BE LIABLE FOR ANY THIRD-PARTY SERVICES OR PRODUCTS IDENTIFIED OR REFERRED TO CUSTOMER. All materials provided in this workshop are copyrighted by VMware ("Workshop Materials"). VMware grants the customer of this workshop a license to use and make reasonable copies of any Workshop Materials strictly for the purpose of facilitating such company's internal understanding, utilization and operation of its licensed VMware product(s). Except as set forth expressly in the sentence above, there is no transfer of any intellectual property rights or any other license granted under the terms of this workshop. If you are located in the United States, the VMware contracting entity for the service will be VMware, Inc., and if outside of the United States, the VMware contracting entity will be VMware International Limited.

7 Monitoring and Troubleshooting

- Describe the monitoring tools for vSphere with Kubernetes
- Describe the troubleshooting tools for vSphere with Kubernetes
- Explain cluster, node, and namespace health
- Explain usage and capacity monitoring
- Describe vCenter Server events
- Describe vSphere with Kubernetes events
- Gather support information

8 vSphere with Kubernetes Lifecycle

- Describe the vSphere with Kubernetes lifecycle
- Describe the Tanzu Kubernetes Grid lifecycle
- Describe scaling a vSphere with Kubernetes cluster
- Update vSphere with Kubernetes
- Update Tanzu Kubernetes Grid clusters
- Remove vSphere with Kubernetes
